CHECK OUT THE
NEST.

Taking your shoes off before going inside, wearing a mask in public spaces, avoiding raw food/dairy, and keeping your cats inside reduce the chances of your fur baby getting sick.

YOUR PETS
CAN'T TAKE
PRECAUTIONS,
BUT YOU CAN.

HOW CAN WE PROTECT
OURSELVES AND OUR PETS?

ONLY CONSUME FULLY
COOKED MEAT AND
PASTEURIZED DAIRY
PRODUCTS.

KEEP YOUR DISTANCE FROM
WILDLIFE.

KEEP CATS INSIDE.

PRACTICE PROPER HYGIENE.

SHARE THESE TIPS WITH
YOUR LOVED ONES.

REMEMBER, CHANGING RECOMMENDATIONS
MEAN WE UNDERSTAND MORE ABOUT THE VIRUS.

Over 15 house cats have died from consuming food contaminated with bird flu.

AVOID FEEDING
YOUR PETS RAW
FOOD AND RAW
DAIRY

Sick cows, cow poop, and dirty equipment can cause harmful things to grow.

RAW MILK CAN HAVE
BACTERIA AND VIRUSES IN IT.

You may have heard about
an outbreak of

Avian Influenza
"BIRD FLU"

Bird flu (H5N1) is a type of
in "flu" enza virus normally
carried by birds that can cause
severe illness and death.

And cats are particularly vulnerable.

Wherever there
are birds, there
could be flu —

& it's not just birds that can catch it.

Many different animals are
dying from the virus, especially
at poultry farms and zoos.

Cheetahs, tigers, lions and other big
cats have died of bird flu infections.

And wipe their paws
when they come
inside.

Avoid letting your pup
near wild animals,
especially birds and
bird poop.

BE CAREFUL ON WALKS
